Prof. IIT Madras), F. Viola (Assist. Prof. GSSI, L’Aquila Italy), G. Stringano (R&D General Electrics), A. Cristallo (R&D General Electrics).

Publications and visibility: Roberto Verzicco has published more than 260 papers in refereed scientific journals, including 1 Nature Physics, 3 PNAS paper, 12 Physical Review Letters, 66 Journal of Fluid Mechanics/Physics of Fluids/Physical Review Fluids, 6 Journal of Computational Physics and 2 Reviews for Applied Mechanics Review (ASME). He has published 1 Perspective paper on Journal of Fluid Mechanics and 1 review paper on Annual Review of Fluid Mechanics. He has written also the description of the word “*Fluidodinamica*” on the most prestigious Italian Enciclopedia (*Enciclopedia Treccani XXI Secolo, l’Universo Fisico*), (2010), p. 213–222).

Characteristics of work: The main characteristics of Verzicco’s work is the interaction among numerical simulations, laboratory experiments and theory performed partially within Verzicco’s reesearch group and partially through a network of collaborations all over the world. He is not method-driven, but rather physics- or application-driven and often had to acquire the necessary knowledge from some other fields to solve some particular problem. This led to various fruitful collaborations with different disciplines, such as physics, mathematics, medicine, biology, and computer science. Most of his research subjects involve

fundamental research even if with an “application perspective”.
